Course Registration: Duke Environmental Leadership (DEL-MEM)

Topics featured: before you enroll, course registration, enrollment window, misc/other, place-based sessions and quick links

Course Registration
This email is designed to help with course registration matters. Be sure to check your email regularly and often (during the registration period) as there may be time-sensitive information.

Spring 2019 NSOE Course Schedule

Before You Enroll
Before you begin enrolling in spring classes, please review the following information.

1. You must enroll in at least 6 credits to be considered a full-time student and to receive federal financial aid, if eligible, and to maintain F-1 visa status, if applicable.

2. Master's Project (MP): Second year students should plan to enroll in either ENVIRON 996 (Capstone) or ENVIRON 999 (MP credits) in the spring. Permission numbers are not required.

3. Students have the option to enroll in a faculty directed independent study project. More information is available at the DEL-MEM Info site.

4. ENVIRON 997.03 Intro to Geospatial Analysis is available. Interested students must contact the Instructor, Pete Harrell

5. ENVIRON 790.60 Built Environment: Community Design for Health and Sustainability is an on-campus course available to DEL-MEMs. Interested students should contact the Instructor Dr. Mozhgon Rajaee; remember to

Enrollment Window and Eligible to Enroll
Course registration in the DukeHub begins Wednesday, October 31 at 7:00am. At that time, students can enroll in up to 12 credits.

Drop/add course registration in the DukeHub ends on Wednesday, January 23. All spring course registration decisions must be completed by the end of drop/add on January 23.

All students have already been marked as eligible to enroll in the DukeHub. If you notice that your account is still marked not eligible to enroll, please let me know. IMPORTANT > If you have a negative service indicator (or hold) on your account, you will not be able to
enroll in spring classes until you resolve the matter related to the hold.

DukeHub

Misc/Other

ENVIRON 614/LAW 714 Coastal Resilience in the Face of Climate Change, 2 credits, Tuesday 8:30–10:20am. The crosslist in environment was just approved for spring. There will be a handful of spaces available for NSOE students. It may take a little while for the course to show up in the DukeHub. For now, you can view the course description here: Recent hurricanes have highlighted the need for coastal communities to address a wide range of issues associated with climate change including increasing resilience when faced with storms and rising sea levels; information-gathering (maps, drones, and scientific research about coastal/ocean processes); law and policy refinements (statutes, regulations, and guidance); and the use of litigation to develop useful common law doctrines relevant to the tidelands and the public trust. Through the use of current cases and policy issues under debate, students will analyze relevant facts, laws, policies, socio-economic considerations, and local ordinances and prepare proposed solutions.

The Duke Global Policy Program in Geneva is an approved elective for DEL-MEMs. More details below. The Duke Global Policy (DGP) Program in Geneva, Switzerland: Overview: The DGP

copy the DEL Program Coordinator, Mel Adragna. View the syllabus for ENVIRON 790.60.

6. ENVIRON 909 Survey of Environmental Leadership is a repeatable course, which can be taken more than once.

7. Travel Courses – Mexico (ENV 975) and Hawaii (ENV 976). There are two exciting travel courses coming up in the spring one to Mexico and the other to Hawaii! If you plan to participate, please enroll in the course as soon as possible. This is important to instructors who need to make arrangements based on the number of anticipated participants. Unclaimed seats for field trips will be offered to students in the on–campus MEM and MF programs. Additionally, students participating in the field trip(s) should expect to pay an additional course fee to be added to their Bursar bill.

8. On–Campus Courses: If you are interested in taking an on–campus at NSOE, be sure to contact the instructor first and copy Mel Adragna, Program Coordinator, on your correspondence. If you are able to enroll, Mel will work with you, the instructor and the NSOE IT team to ensure the remote connection is possible and makes sense given the format of the class.

9. Please try to complete your spring course registration process no later than November 14; this is especially important for a student wanting to take an on–campus course at NSOE.
Program connects students with highly-competitive international summer internship opportunities while providing access to top-policy practitioners and experts through a 3.0 credit applied learning course (also available without an internship through our course-only program). The Program is ideal for students interested in public policy, the environment, energy, global health, economics, migration, and international affairs. Students typically intern at United Nations agencies (i.e. WHO, IOM, etc.) or certain large Geneva-based non-profits. Candidates should be highly motivated, and possess strong research and writing skills. Check out the program’s short overview video to learn more. Interested? Contact sarah.burrichter@duke.edu

10. All students must enroll in the Program Area Seminar (ENVIRON 998) spring 2019. The course will meet 3–4 per semester, and students will earn ONE credit hour towards the 30 credits required for graduation. This seminar will assist students in all phases of the MP process, from developing research questions to presenting results.

Spring 2019 NSOE Course Schedule

Place-based Sessions and Graduation

Graduation: Students will receive a separate email about preparing for graduation. In the meantime, when choosing your courses for the spring, remember that no more than 3 credits of independent study courses may count towards the 30 credits required for graduation.

After the December 2018 place-based session (12/9–12/11), first year students will not be expected back on-campus until August 2019, with similar dates as 2018, but only 2.5 days of programming instead of 5 days (likely Sunday–Tuesday). Final dates/times to be confirmed in late-spring.

For future planning, the Washington, D.C. Leadership Module (ENV 965) will be held December 7–11, 2019. This is required of all students.

For second year/graduating students: Spring place-based session will occur May 9–10 (required) and May 11–12
This place-based session is dedicated to the leadership wrap-up and graduation.

NSOE Recognition Ceremony will occur on Saturday, May 11 and the university-wide Commencement Ceremony will occur on Sunday, May 12. Academic apparel required for both ceremonies and attendance is encouraged but not required. More details to come in late fall/early spring.

Questions?
Should you have questions and/or run into trouble during the registration process, send an email to nsoe-registrar@duke.edu or call 919–613–7459.
