# CAIRNS WEEKLY NEWSLETTER

## Happy Monday!

Thanksgiving break is just around the corner - hang in there!

We hope you all enjoyed cohort dinner last Thursday (photo of dinner below - courtesy of Nicki). Nicki and I are hoping to host more casual CAIRNS events in the spring semester, whether it be more dinners, a movie night, or an event of your choice (if you have specific ideas, feel free to send them over to [meilin.chan@duke.edu](mailto:meilin.chan@duke.edu))!

[Sustainability Career Panel - Moving to Spring Semester](#)

provide [your input here](#). We will use the results of this survey when bringing in professionals for the panel.

Have feedback or something you would like us to know? You can leave [anonymous feedback here](#)!

[Register for Rethinking Thanksgiving: Solidarity with Indigenous Resistance \(8pm EST\)](#)

While the celebration of Thanksgiving has changed over time, we must continue to acknowledge and educate ourselves on the holiday's colonialist roots. We can still give thanks over the break while also acknowledging Thanksgiving's history. Join the Rethinking Thanksgiving webinar to hear from Indigenous voices, and learn how to further support Indigenous efforts to protect land and water.

The Nicholas Institute has a [calendar full of events](#) for the upcoming semester! Check out these happening this week:

Illuminating Hidden Harvests: A snapshot of key findings webinar - Tuesday, Nov. 23 @10am EST

Due out in 2022, the Illuminating Hidden Harvest (IHH) report ties together the efforts of nearly 800 authors and experts to contribute to a more complete picture of small-scale fisheries. Drawing on a tapestry of methods, including 58 country and territory case studies, the report examines the current environmental, social, economic and governance contributions of marine and inland small-scale fisheries at global and local scales. In this webinar, the IHH chapter leads will share a few key findings from the report and respond to audience members' questions during the Q&A session.

Offshore Wind and Wildlife: Opportunities to Get it Right - Monday, Nov. 29 @12:30 EST

Though it lags behind other areas, the US offshore wind industry is growing quickly with substantial construction set to occur in the coming years. The potential for impacts to wildlife is important to consider as we strive to responsibly develop this vital renewable energy source. We will discuss lessons learned from other areas of the world where offshore wind has been extensively developed, and how we can incorporate these lessons with the community of stakeholders in the US to create a responsible supply of clean energy.
