Coming from Sichuan, southwest China, Eudora loves the spicy food, laid-back culture, and the fantastic biodiversity of her home province. She earned her B.S. in Biology and Environmental Science and Policy at Duke University. After graduation, she joined the Aldo Leopold Foundation as a Land Stewardship Fellow where she worked on invasive species control, habitat restoration, and prescribed burning. Now, as a second-year Master of Forestry student at Yale School of the Environment, she aspires toward a career of a global forester where she can work with people and trees toward a more sustainable future. She currently works as a program associate at the Forests Dialogue, coordinating and facilitating international, multi-stakeholder dialogues on contentious forest-related issues such as fire and climate-positive forest products.

When Eudora is not in classes or at work, she enjoys cooking recipes from different cultures, hiking with her dog Tail, or curling up on the couch with a good book and her guinea pigs, Tofu and Turnip.
