

SECOND NATIONAL CONFERENCE

JUSTICE IN THE GEOSCIENCES

**Join the coalition
to make the next
50 years different!**

**Washington, DC
August 14–17 2022**

The Earth is the home we all share - and yet, year after year for the last 150 years, more than 90% of the geoscience workforce has been white. The knowledge needed to solve today's existential challenges of climate, energy and water demands a scientific discipline that reflects the racial, cultural and historical diversity of our nation and world. To solve these challenges, we must radically transform earth-learning environments.

In summer 2022, the Second National Conference will assemble experts and leaders across a range of disciplines who are seeking to form coalitions and generate transformative ideas for change. We will chart a collective course toward justice that is grounded in accountability, intentionality, innovation and the imaginary, and guided by the goals of broadening participation and advancing student success in geosciences and related disciplines.

Participant-driven, 'unconference' style agenda

Research topics at the nexus of geoscience, education, social science, humanities, arts, and STEM scholarship to grow convergence research

Opportunities for action-planning and coalition-building around shared goals

250 in-person participants; unlimited virtual participation

3.5 days in Washington, DC with optional field trips

Keynote plenaries, discussion sessions, community-building and more!

BUILDING ON LEGACY:

In the summer of 1972, Randolph Bromery and other geoscientists convened the First National Conference on Minority Participation in Earth Science and Mineral Engineering. Attended by over 300 representatives of academia, government, civil rights organizations, and industry, the First National Conference was a watershed event focused on barriers, opportunities and strategies for broadening participation of Black, Latinx and Native/Indigenous Americans in Earth sciences & related disciplines.

AFFILIATION OF THE PARTICIPANTS OF THE 1ST NATIONAL CONFERENCE

JOIN US IN WASHINGTON, DC ON AUGUST 14-17 2022

We will celebrate fifty years of leadership, community-building, and resilience in geoscience as we convene at the Second National Conference to give shape to a justice-centered next 50 years, together.

BENEFITS OF SPONSORSHIP:

	Name listed in conference program and 2072 Report	Logo on conference website	Recognition during opening remarks	Brief remarks at conference from a representative of your organization during a plenary session	Guarantee in-person registration for a delegation of up to 2 representatives from your organization to the conference
