NanoAffix Science is a spin-off company from University of Wisconsin-Milwaukee (UWM) located on the UWM Innovation Campus.

NanoAffix Science is seeking full-time and part-time engineering interns to work on federally-funded R&D projects. The positions are available for engineering graduate and undergraduate students. Five different intern positions are available in the following areas: material characterization, electronic device testing, prototyping with 3D printing, electronic circuit design, and electrochemistry. Intern positions are available immediately, in the summer, and in the fall and spring semesters.

Questions, as well as resume and contact information for positions should be sent to nanoaffix.jobs@gmail.com.
