

PITTSBORO

SUPPORT YOUR COMMUNITY!

JOIN THE GENX EXPOSURE STUDY

Curious about chemicals in your community and in your body?

Residents of Pittsboro may be eligible for the GenX Exposure Study. This research study is trying to learn about PFAS in people and their potential health effects.

Get unique information about your health

We will be measuring PFAS in your blood and doing other health-related blood tests.

You will receive \$20 for your time.

What will be asked of you?

- Complete a questionnaire
- Provide blood and urine samples
- Agree to be recontacted over time

We will be at...

- The Chatham County Agriculture and Conference Center for Saturday, November 13, 2021 and Sunday, November 14, 2021

Learn more:

- Call this number: 855-854-2641,
- Visit our website: genxstudy.ncsu.edu, or
- Scan the QR code

What are PFAS?

PFAS stands for per- and polyfluoroalkyl substances. They are a group of over 9,000 unique, human-made chemicals. PFAS are linked to multiple health effects.

What is GenX?

GenX is a PFAS. In 2016, GenX was found in drinking water in the Wilmington, NC area.
